

VIT C 22.5% MAX AMPOULE

Vit C 22.5% max nanoampoule is specially formulated for instant glow and brightening treatment. It also enhances the glutathion result for whitening.

Know more about Vitamin C ampoule?

Topical vitamin C or ascorbic acid is a popular vitamin being added to skin care products. Currently there are many advertising claims of topical formulations containing antioxidants that will protect against and reverse ageing. However, the truth is that many of the available formulations contain very low concentrations of antioxidants that are not well absorbed by the skin. On the other hand, when Vitamin C is manufactured into a stable topical formulation presented in glass ampoules, it is a powerful antioxidant that is proven to be effective in protecting against the photo-aging of the skin.

STEP 1 : CLEANSING

activator Pre-treatment Gel

Rinse the face with water. Apply the product gently and massage for 1-2 minutes. Remove with a soft damp cloth or rinse gently with water. Your skin is ready for the treatment. Non greasy. Alcohol-free. Avoid in sensitive, reactive skin and eye contour.

STEP 2 : PROTECTION

protective petroleum jelly

Apply protective petroleum jelly around sensitive areas - periocular area, lips, nasal mucosa.

STEP 3 : NANOROLLER

nanoroller

Gently apply the nanoroller all over the treatment area with multiple passes, until the treatment area becomes pinkish / reddish. Use pressure if necessary. If irritation occurs, stop the procedure immediately and apply **aloe gel**.

STEP 4 : NANOAMPOULE

nanoampoule

Apply the nanoampoule & leave it for 2 - 3 minutes. Apply a second coat on the focused area if needed.

If irritation occurs, rinse off immediately with plenty of cold water.

Note: Physicians using their knowledge may select **nanoampoule** depending on skin condition.

STEP 5 : NANOMESO

nanomeso

Apply the single dose of **nanomeso** solution and gently massage till penetration. Gently massage till total absorption. Do not neutralize.

If irritation occurs, rinse off immediately with plenty of cold water.

STEP 6 : REPEAT STEPS 3, 4 & 5

repeat

Repeat step 3, 4 & 5, 2 to 3 times

Note: Do not neutralize.

STEP 7 : NANOSERUM (post-treatment Care)

nanoserum

Apply gently a thick layer of **nanoserum** on the treatment area.

Personal Care (prescription) : Physician may prescribe **Leaderma** personal care products for continuing the treatments at home.
