

Glow meso cocktail gives you glowing skin in a few treatments. It is used topically with a nano roller for maximum penetration.

What is glow mesotherapy?

Glow mesotherapy uses a Micro Needle Therapy System (MTS) combining the skin coloured pigment with niacinamide and peptides along with natural growth factors for effective brightening and anti-aging benefits leaving fine lines and wrinkles plumped, pores diminished and skin with an effective glow to your skin.

What can you expect?

Treatment time takes approximately thirty minutes and whilst not painful, it can be slightly uncomfortable so an anesthetic cream can be used if the skin is a little sensitive. With minimal downtime – a little bruising and swelling may occur but it will be short lived and should settle within 24 hours – skin will become more radiant, hydrated, nourished and firmer with an improved texture. A course of 6-8 sessions are advised every two weeks with maintenance treatments 1-2 times a year.

What are the benefits?

Mesotherapy can instantly improve dull, tired looking skin and superficial wrinkles but can also help to improve sluggish blood circulation, aiding the body to flush out aging toxins. This treatment can also be used to address pigmentation problems, treat acne scarring and be combined to enhance the effects of other aesthetic treatments such as botox or fillers.

glow Meso Cocktail

5 ml / 0,17 Fl. Oz x 10 ampoule

Phototypes I-VI

Indication

Glowing Effect

Ingredients

Aqua / Water, Dimethylaminoethanol Tartrate, Sodium Hyaluronate, Sodium Hydroxide, Ascorbic Acid, Sodium DNA, Sodium Methylparaben, Silanetriol, Potassium Sorbate, Sodium Benzoate.

STEP 1 : CLEANSING

activator Pre-treatment Gel

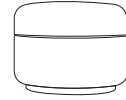

Rinse the face with water. Apply the product gently and massage for 1-2 minutes. Remove with a soft damp cloth or rinse gently with water. Your skin is ready for the treatment.

STEP 2 : PROTECTION

protective petroleum jelly

Apply protective petroleum jelly around sensitive areas - periocular area, lips, nasal mucosa.

STEP 3 : NANOROLLER

nanoroller

Gently apply the nanoroller all over the treatment area with multiple passes, until the treatment area becomes pinkish / reddish. Use pressure if necessary. If irritation occurs, stop the procedure immediately and apply **aloe gel**.

STEP 4 : NANOAMPOULE

nanoampoule

Apply the single dose **Vitamin C (ampoule)** solution and gently massage till penetration.

STEP 5 : NANOMESO

nanomeso

Apply the nanomeso using a nanoroller on the treatment zone to puncture the skin, apply little pressure if needed. Apply a second coat on the focused area. Leave it until dried or wash or naturalized, if needed. If irritation occurs, rinse off immediately with plenty of cold water.

STEP 6 : REPEAT STEPS 3 & 5

repeat

Repeat step 3 & 5, 2 to 3 times
Note: Do not neutralize.

STEP 7 : NANOSERUM

nanoserum

Apply gently a thin layer of **skin DNA repair nanoserum** using your fingertips. Massage till total absorption.

Personal Care (prescription) : The physician may prescribe **Leaderma** personal care products for continuing the treatments at home.
