

Mandelac nanopeel is specially formulated for teenagers having mild to severe acne, photoaged skin, skin spots, greasy skin and skins sensitive to other AHAs. It is also effective for hydration, moisturising and glows. It clears the face in a few treatments, leaving your skin clearer, brighter & more youthful. Suitable for all skin types.

Mandelac is a line of products formulated with mandelic acid, especially recommended for skins that are intolerant to other alpha hydroxy acids (AHAs).

#### What does a mandelac peel do?

Mandelac acid a natural chemical peeling agent it is used to accelerate cell turnover. It helps in reducing the appearance of fine lines, dark patches, acne blemishes, and other common skin concerns.

#### Is mandelac acid an AHA or BHA?

- The most famous AHA is probably glycolic acid, whilst citric, mandelic and lactic acids are other key examples.
- There is only one BHA – beta hydroxy acid – more commonly known as salisalic acid.

Basically, if you have blemish-prone skin and you aren't already using BHA, you'd better start now.

#### Does mandelac acid lighten the skin?

Well, mandelic acid could treat your skin needs, only mandelic acid helps do all of the above because it acts as a liquid exfoliant, it can also tell your skin to stop making uneven pigmentation.

#### How long do you leave mandelac acid on?

Pleasingly this mandelic acid is a long-term clarifier that does a stellar job at blitzing dirt from your pores. Generally, 3 to 5 minutes leave on is good enough.

#### What happens after mandelac acid peel?

There should only be minor stinging while the peel is being applied, which only lasts 10 minutes. Typically, there is no peeling from a mandelic peel, but some will experience flaking of dead skin cells post-treatment.

### mandelac 30% pure peel medium

## STEP 1 : CLEANSING

### activator Pre-treatment Gel

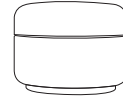

Rinse the face with water. Apply the product gently and massage for 1-2 minutes. Remove with a soft damp cloth or rinse gently with water. Your skin is ready for the treatment.

## STEP 2 : PROTECTION

### protective petroleum jelly

Apply protective petroleum jelly around sensitive areas - periocular area, lips, nasal mucosa.

## STEP 3 : PEEL 1

### ferulic peel

Apply the ferulic nano peel using a brush, leave it for 3-5 minutes & re-apply second coat and massage till absorption. If irritation occurs, rinse off immediately with plenty of cold water.

## STEP 4 : PEEL 2

### mandelac pure peel

Apply the mandelac pure peel solution using a peel brush and leave it for 5-10 minutes. Remove the mandelac pure peel by applying neutralizing lotion. If irritation occurs, rinse off immediately with plenty of cold water. **Recommended-** (Use retinol yellow peel 4% mild after the use of mandelac peel for better results).

## STEP 5 : Neutralize (Post-treatment)

### neutralizer

Spray **neutralizer** on the skin and clean it with sterilized gauze. Use pressure if necessary. **Note:** Do not neutralize the leave on peels.

## STEP 6 : Sun Protection (Post-treatment Care)

### sun defense

Apply gently a thick layer of **Sun defense cream** on the face & body.

**Personal Care (prescription)** : the physician may prescribe **Leaderma** personal care products for continuing the treatments at home.

**Disclaimer:** All professional treatments are strictly recommended to be performed by certified physicians.
