

WHITENING GLUTATHIONE MESO COCKTAIL

Glutathione meso cocktail helps to whiten the desired area of the body. It is used topically with a nano roller for maximum penetration.

What is glutathione?

Glutathione is a substance produced naturally by the liver. It is also found in fruits, vegetables, and meats. Glutathione is made up of three amino acids: cysteine, glycine, and glutamate. Glutathione acts as an important antioxidant in your body. That means it helps combat free radicals generated in your body. Free radicals have the tendency to damage your body's healthy cells. As the body ages, or suffering from other diseases such as stroke, HIV, cancer, etc., glutathione level starts decreasing.

Can glutathione make you whiter?

Glutathione is an antioxidant naturally found in human cells that neutralizes free radicals, boosts the immune system and detoxifies the body. It can also cause skin lightening by converting melanin to a lighter color and deactivating the enzyme tyrosinase, which helps produce the pigment.

How is it beneficial in skin whitening?

Glutathione inhibits melanin formation (pigment material of skin) by quenching free radicals and peroxides that contribute to tyrosinase activation and melanin formation. Its antioxidant property also protects the skin from UV radiation and other environmental as well as internal stressors that generate free radicals that cause skin damage and hyper-pigmentation.

How long does glutathione take to whiten?

Results visible on Light-medium brown skin: 1-3 months, Dark brown skin: 3-6 months, Very dark skin: 6-12 months & Black skin: 18 months minimum and above. A Glutathione efficacy in skin lightening works only if it is taken with Vitamin C at least equal or twice its dosage.

whitening glutathione Meso Cocktail

5 ml / 0,17 Fl. Oz x 10 ampoule

Phototypes I-VI

Indication

Whitening Effect

Ingredients

Aqua / Water, Glutathione, Sodium Ascorbate, Sodium Chloride, Sodium Hydroxide.
